## DETAILED ACTION

### *Continued Examination Under 37 CFR 1.114*

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114.

Applicant's submission filed on September 3, 2003 has been entered.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-6, 8 and 17 are rejected under 35 U.S.C. 102(e) as being anticipated by Shiraishi et al. (US 20020051326).

With regards to claims 1, 3 and 6, Shiraishi discloses a piezoelectric actuator comprising two movable members (52); a piezoelectric device disposed on at least one side of the movable part (51b); the base is constructed with one sheet of a flat plate; the fixing part has a flat plate shape and the movable parts are erected by a predetermined height from side peripheries.

4. With regards to claim 2, Shiraishi discloses the slit shaped grooves (figures 5 and 6).

Art Unit: 2834

5. With regards to claim 4, Shiraishi discloses the grooves intervening with the end of the fixing part and the mounting parts (Figures 5 and 6).
6. With regards to claims 5 and 8, Shiraishi discloses the rectangular opening (Figures 5 and 6).
7. With regards to claim 17, Shiraishi discloses a metal flat plate (80).

***Claim Rejections - 35 USC § 103***

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

9. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
10. Claims 9 and 10 are rejected under 35 U.S.C. 103(a) as being obvious over Shiraishi. Shiraishi discloses basically the claimed invention except for the base having a circular arc shape. It would have been an obvious matter of design choice to have the base with circular shape, since the applicant has not disclosed that the circular shape of the base solves any problem

or is for a particular reason. It appears that the claimed invention would perform equally well with the rectangular shape as disclosed in Shiraishi.

***Allowable Subject Matter***

11. Claims 7, 11-16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

12. The following is a statement of reasons for the indication of allowable subject matter: the prior art of record fails to teach either alone or in combination the smaller thickness of the central portion (claim 11); the reinforcing part located at an end of the fixing part (claims 12-14) and the enlargement of the fixing part (Claim 15-16).

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jaydi A. Aguirrechea whose telephone number is 703-305-2277. The examiner can normally be reached on M-Th 9-7.
